Thesis: *Impact of The Decentralization Reform on The Quality of Local Public Services in Ukraine*

RESEARCH INTERESTS

I study how political actors in authoritarian regimes use digital communication spaces to control, exploit, and manipulate information creation, dissemination, and consumption. I use computational (text analysis and network analysis) and conventional econometric methods. My dissertation investigated the effects of digital media, particularly the messaging app Telegram, on the protests in Belarus in 2020 and the 2022 anti-war protests in Russia.

TECHNICAL SKILLS

Statistical software: Stata, R, RStudio, Python

Methodology: Regression analysis (OLS, maximum likelihood estimation, hierarchical models, multi-level modeling, time series, Bayesian), natural language processing, causal inference, web scraping, API
